Problem → Action → Result

Challenge

Large automotive parts store with thousands of active listings, promoted campaigns, stock issues and daily order flow needed regular Seller Hub monitoring.

My Action

Monitored active listings, checked Promoted Listings performance, tracked sales/order reports, reviewed out-of-stock visibility and prepared optimization notes.

Result

The store recorded \$100K+ sales in 31 days, 50x ROAS from promoted listings and 5,543 active listings under management.

Managed Seller Hub operations for a store that recorded \$100K+ sales in 31 days.

Project scope: listing management • ad monitoring • order management • sales reporting • inventory issue tracking

Repeatable process for eBay store management

This slide shows the client that the work is system-driven, not just a collection of screenshots.

01

Store Audit
Review listings, ads, inventory, orders and recent sales movement.

02

Listing Monitoring
Check active/inactive listings, out-of-stock items, status and visibility.

03

Promoted Listings Review
Monitor clicks, ad sales, ad fees, ROAS and campaign status.

04

Order & Inventory Tracking
Review order flow, shipping status, buyer notes and stock-related risks.

05

Weekly Reporting
Summarize sales, order value, ad results and listing issues clearly.

06

Optimization Notes
Recommend listings to boost, restock, review pricing or improve content.

Cropped Seller Hub advertising metrics

What this proves

Experience monitoring eBay Promoted Listings performance and understanding ad sales, fees, clicks and ROAS in Seller Hub.

Action focus

Campaign status checking, performance review, inefficient campaign spotting and weekly PPC reporting recommendations.

Portfolio insight

The campaign showed high ad-attributed sales with efficient ad spend, making it strong proof for eBay PPC support.

Operational support connected to measurable marketplace results
