

Ongoing Virtual Assistance for Marketplace Operations

A two-page sample document showing the kind of ecommerce support, reporting, and coordination I can provide for online stores and marketplace sellers.

Core Platforms

Amazon • Shopify • eBay • TikTok Shop • Shopee • Lazada

What this service covers

- Daily store support for routine backend tasks and marketplace follow-up
- Product updates, listing corrections, variation checks, and content coordination
- Order monitoring, issue follow-up, and operational task tracking
- Customer message handling support and basic admin assistance
- Promotion follow-up, reporting, and marketplace workflow organization

Typical client problems I help solve

Problem	How I support
Disorganized day-to-day store tasks	Create a simple workflow for updates, follow-ups, and recurring marketplace actions.
Slow product changes and missed backend work	Handle routine edits, listing fixes, and update coordination on time.
Weak visibility over orders or operations	Track tasks, flag issues early, and maintain a clean reporting structure.
No clear support system for marketplace admin work	Act as a reliable ecommerce VA for ongoing execution and communication.

Sample weekly support workflow

Day / Phase	Example support activities
Start of week	Review store tasks, open issues, urgent updates, and priority product changes.
Mid-week	Handle listing edits, backend checks, order follow-up, and communication support.
End of week	Prepare a simple progress summary with completed tasks, pending items, and next steps.

Sample deliverables and reporting format

Below is an example of the kind of structured support summary a client can expect from ongoing marketplace virtual assistance.

Deliverable	Example output
Task tracker	A simple list of completed, ongoing, and pending marketplace tasks.
Listing update log	Record of edited products, corrections made, and follow-up items.
Operations summary	Highlights of order issues, customer support actions, and store updates.
Weekly report	Short summary with wins, risks, bottlenecks, and recommended next steps.

Example weekly report snapshot

Area	Sample note
Listings	12 products updated, 4 titles corrected, 2 variation issues flagged for review.
Orders / operations	Routine order follow-up completed; 3 pending cases noted for next action.
Customer support	Buyer messages reviewed and basic responses coordinated.
Promotions	Promotion dates checked and one product offer update requested.
Next steps	Review pending tasks, confirm product assets, and continue marketplace monitoring.

Why this is useful for clients

- Keeps daily marketplace work organized and easier to track
- Reduces missed updates and routine operational delays
- Gives the store owner a clearer view of what is done and what needs attention
- Supports smoother communication, better follow-up, and more consistent store management

This sample document is designed for portfolio or Project Catalog use. It demonstrates the structure, support style, and reporting approach I can provide as an ecommerce virtual assistant for marketplace operations.
